## 2.0 Correctional Programming

### 2.1 Correctional Program Fidelity

Beginning in the spring of 2016, DOC staff participated in a University of Cincinnati Corrections Institute (UCCI) training on fidelity monitoring using their group observation and coaching process. The form is designed to provide a platform for trained staff to observe and rate program delivery in six individual skill areas and adherence to specific program curriculums, providing an overall fidelity score. The scores can range from 0-2. A zero score indicates "needs improvement," 1 indicates "satisfactory," and 2 "very satisfactory." Initial overall score goals for Maine DOC programs was set at 1.5, with no individual skill area being under 1. All scores for each observation are entered in a database that keeps cumulative overall scores for each program.

Immediately following each observation, rater feedback is provided to program staff to highlight strengths and areas of needed improvement. Cumulative reporting on each program has been provided to identify Department-wide areas of need, and specific targeted training to reinforce skill areas has been provided.

The table below shows DOC core programming cumulative scores since starting the project. The first four programs are in our Adult Facilities, and the last three are in the Juvenile Facility. To date, all core programs included in the project are being delivered above our initial goal of 1.5.

*These are current to March 6<sup>th</sup>, 2018*
